RAGIL KP

IT SUPPORT ENGINEER | IT COORDINATOR | TECHNICAL OPERATIONS
Al Qusais, Dubai, UAE | +971 541442279 | ragilkp007@gmail.com
LinkedIn | GitHub

PROFESSIONAL SUMMARY

IT and technical operations professional with experience in Level 1 chat-based technical support, application support, web-hosting environments, and software development. Skilled in troubleshooting website, hosting, and application-related issues; documenting incidents; tracking support requests; and coordinating escalations. Familiar with Windows, Linux, DNS, TCP/IP fundamentals, cPanel, Microsoft 365, Pega CRM, and ticketing systems. Strong foundation in technical documentation, user assistance, issue resolution, and deployment support, with a customer-focused approach and willingness to learn new IT systems and processes.

CORE TECHNICAL SKILLS

IT Support: Level 1 Technical Support, User Assistance, Application Support, Production Support, Incident Logging, Issue Tracking, Troubleshooting, Escalation Coordination
Systems & Networking: Windows, Windows Server Fundamentals, Linux, DNS, TCP/IP Fundamentals, Hosting Environments, Basic Network Troubleshooting
IT Operations: IT Coordination, Technical Documentation, SOPs, Root Cause Investigation, Software Deployment Support, Follow-up Management
Business Applications: Microsoft 365, Pega CRM, cPanel, Legacy Systems, CRM Platforms, Ticketing Systems
Technical Tools: SQL, MySQL, Postman, Git, GitHub, Microsoft Office
Development Knowledge: Java, Python, Spring Boot, Django, REST APIs, HTML, CSS, JavaScript

PROFESSIONAL EXPERIENCE

Junior Associate – Tech Operations **Oct 2024 – Oct 2025**
UnifyCX

- Provided Level 1 chat-based technical support for a web-hosting company, handling customer enquiries and troubleshooting hosting, website, and service-related issues.
- Investigated reported technical problems involving Linux hosting environments, DNS configurations, cPanel, and business applications.
- Diagnosed server-level issues, performed initial troubleshooting, and coordinated escalations for complex or unresolved incidents.
- Logged and documented customer issues, maintained accurate ticket information, tracked pending requests, and followed up on cases.
- Supported day-to-day application and IT operations using Microsoft 365, Pega CRM, cPanel, legacy systems, and ticketing platforms.
- Assisted with customer account onboarding and offboarding requests and maintained related service information.
- Prepared and maintained technical documentation to support issue investigation, service requests, and operational processes.

Java Spring Boot Developer Intern **Sep 2025 – May 2026**
Luminar Technolab

- Developed and deployed 15+ RESTful services using Java and Spring Boot for business applications.
- Investigated application issues, performed debugging and unit testing, and implemented input validation and exception handling.
- Optimized database interactions and query performance, improving API response time by approximately 25%.
- Supported application deployment and troubleshooting while working with technical requirements and documentation.

Python Django Developer Intern **Jul 2024 – Sep 2024**
Riss Technologies

- Developed 6+ backend modules and REST API endpoints using Python, Django, and relational databases.
- Implemented data validation, error handling, and data integrity controls; participated in debugging and application testing.

TECHNICAL PROJECTS

Immuna – Digital Immunization Management System *Spring Boot, Vue.js, MySQL*

- Developed a full-stack application for managing vaccination records, schedules, and automated alerts.
- Built 12+ REST APIs with JWT authentication and MySQL integration across 5+ core entities.

Luminar ExamHub *Java, JSP, MySQL*

- Developed an MVC-based exam management application with student management, scheduling, authentication, and role-based access control.

EDUCATION

Master of Computer Application (MCA) **2023 – 2024**
Srinivas Institute of Technology
Bachelor of Computer Application (BCA) **2018 – 2021**
Kannur University

CERTIFICATION & LANGUAGES

AWS Elastic Load Balancing with Auto Scaling Groups – Udemy
Languages: English, Malayalam, Tamil
