PROFESSIONAL SUMMARY

IT and Software professional with experience in technical support, application support, production systems, server troubleshooting, deployment, databases, and software development. Skilled in Windows, Linux, DNS, Microsoft 365, business applications, Java, Python, REST APIs, SQL, Git, and troubleshooting. Experienced in production support, software development, testing, documentation, and IT operations.

TECHNICAL SKILLS

IT Support: Technical Support, Application Support, Production Support, User Support, Incident Troubleshooting, Issue Resolution, IT Operations
Systems & Networking: Windows, Windows Server, Linux, DNS, TCP/IP, Network Troubleshooting, Server Systems, System Configuration, Software Deployment
Programming: Java, Python, JavaScript, C++, C
Software Development: Spring Boot, Spring MVC, Django, JSP, Servlets, REST APIs, HTML, CSS, React.js, Vue.js
Databases: SQL, MySQL, MongoDB, PL/SQL, Database Management, Data Validation, Data Integrity, Query Optimization
Testing & Tools: Software Testing, Unit Testing, API Testing, Debugging, Postman, Git, Maven, Gradle, GitHub
Business Applications: Microsoft 365, Microsoft Office, CRM, ERP Concepts, Zoho, cPanel, Ticketing Systems, ServiceNow Concepts, Monday.com Concepts
Operations: System Integration, Deployment Support, Technical Documentation, SOPs, Reporting, Data Management, Root Cause Analysis, Problem Solving, Communication, Teamwork

PROFESSIONAL EXPERIENCE

Junior Associate – Tech Operations **Oct 2024 – Oct 2025**
UnifyCX

- Supported production systems and business applications, including Linux hosting, DNS configurations, deployments, and technical troubleshooting.
- Diagnosed server-level issues, investigated root causes, and supported system stability and uptime.
- Worked with Microsoft 365, Zoho, cPanel, CRM, legacy systems, ticketing systems, and technical documentation.

Java Spring Boot Developer Intern **Sep 2025 – May 2026**
Luminar Technolab

- Developed and deployed 15+ RESTful services using Java and Spring Boot for production-ready applications.
- Optimized database interactions and query performance, improving API response time by approximately 25%.
- Implemented input validation, exception handling, unit testing, debugging, and deployment support.

Python Django Developer Intern **Jul 2024 – Sep 2024**
Riss Technologies

- Developed 6+ backend modules and REST API endpoints using Python, Django, and relational databases.
- Implemented business logic, validation, error handling, and data integrity controls for reliable application processing.
- Participated in Agile development, debugging, testing, and application delivery.

PROJECTS

Immuna – Digital Immunization Management System *Spring Boot, Vue.js, REST APIs, MySQL*

- Developed a full-stack application for vaccination records, immunization tracking, and automated alerts.
- Built 12+ REST APIs with JWT authentication and MySQL integration covering 5+ core entities.

Luminar ExamHub *Java, JSP, MySQL*

- Developed an MVC-based exam management system with scheduling, student management, authentication, and role-based access control.

Traffic Management System *Django, REST APIs, Java/Kotlin*

- Developed a traffic monitoring system with an Android client and Django backend, including 8+ REST APIs for real-time traffic alerts.

EDUCATION

Master of Computer Application (MCA) **2023 – 2024**
Srinivas Institute of Technology
Bachelor of Computer Application (BCA) **2018 – 2021**
Kannur University

CERTIFICATION

AWS Elastic Load Balancing with Auto Scaling Groups – Udemy
